HYDROSTATIC BABBIT STYLE SPINDLES

Cincinnati Machines XG/Z-XG Series Centerless Grinders are designed and manufactured from the ground up to provide optimum quality, efficiency, and reliability. The heavily ribbed meehanite castings are combined with the standard outboard supports for both the grinding and regulating wheel spindles to insure maximum rigidity and stability. Add to that, the hydrostatic babbit type spindles, the automatic lube system, and a wide variety of available grinding accessories, and you have one very versatile, reliable, and efficient centerless grinder.
