DALEX-SERVO ROBOT C-GUN

Servo-drive with very fast and highly precise raising of electrode force (without blow die to die) for relevant shorter cycle time and uniform welding spot production

Electrode level compensating: servo-driving

Force of electrode: 0,7 up to 7 kN

Rated power 73 kVA alternating current
(alternative medium frequency direct current)

Stroke 120 mm

Uniform user interface (operating panel); optional as cabinet or mobile panel
