

FlexArm™

Tapping & Assembly
Arm Solutions

Want to save CNC cycle time AND get the tapping flexibility you need?

Need to save time and money while improving quality and efficiency?

Looking for consistently quick, straight tapping – every time?

Isn't it time to save waste from broken taps and inconsistent operations?

Trust **FlexArm** to take care of tapping, chamfering, reaming and more WHILE your CNC is milling and drilling. By using a FlexArm during your machining cycle, your operator can increase the efficiency of your operation and move completed parts out faster and easier.
