GT2-GT4

TABLE AXES: VERTICAL

SECTOR OF APPLICATION: HEATING AND AIR CONDITIONING INDUSTRY

MATERIAL: BRASS/BRONZE

GT2-GT4 (PATENTED) New line of Transfer Machines, designed for the machining of all kind of materials (brass, cast iron, steel, etc..) with an incomparable flexibility and versatility. Can be configured in different modes, allows machining of multiway parts. By using the latest technology (all axes controlled by NC, Direct Drive, CNC ed and digitali drives, electrical continuously rotating chucks and clamping jaws, etc) it is possible to achieve an excellent flexibility and still keep cycle times reduced, thanks to the use of two spindles GT2 or four-spindles GT4 units. TECHNICAL SPECIFICATIONS» UP TO 6-WAY FLEXIBLE TRANSFER MACHINE WITH HORIZONTAL/VERTICAL TURRET AXIS» INTEGRATED 4/2 SPINDLE MACHINING CENTERS» REDUCED CHIP TO CHIP TIME (
