## **W11SNC-40X2000 3-rollers hydraulic rolling machine**

W11S is the hydraulic three rollers plate rolling machine, The bottom two rollers drive the upper roller turn, Three rollers are turning at the same time. So the steel plate is rolled into round shape. The upper roller can do the up and down movement. Also the upper roller can do the forwarder and back movement.

**Advantages:** The upper roller can do the up and down movement. Also the upper roller can do the forwarder and back movement. So the advance bending for two ends of the steel plate can be finished in the plate rolling machine.
