NANTONG JUGAO

FOR MACHINES, WE ARE MORE PROFESSIONAL QUALITY

B、Performance

- The second generation of shear.
- Welded steel plate construction, hearing to eliminate stress, with high strength and good rigidity.
- Advanced integrated hydraulic system with excellent reliability quality.
- Rapidly, accurately and conveniently adjusting the blade clearance with the handwheel.
- The adjustable rake angle can minimize plate deformation
- As the cutting beam has been designed in inner-inclined structure, it is easy for plates to fall down and the accuracy of products can be also guaranteed.
- Shearing in sections, shadow-line cutting.
- Counter for the motorized back gauge.
- Plate-support of back of machine(optional).

C: Characteristics of our machine is superior to other Chinese machines

- Using the Gear pump. Other Chinese machines adopt the axial piston pump. Our pump with lower noise, higher quality and advanced technology.
- Using the energy accumulator for returning stroke.. Other Chinese machine use the nitrogen cylinders, Our returning can avoid frequency nitrogen-padded, only need oil charge, and only need one time a year under normal operation. It's easier to operate, and efficiency is improved.
- Our machine with infrared protection device at back gauge area.
- Shearing machine and press brake with safety guard.
