

LAGUNA REVO

REVOLUTIONARY DC SERVO MOTOR TECHNOLOGY

REVO 20
36

REVO 24
36

- The Laguna Revo was designed for the discerning woodturner who needs a professional quality lathe with world class features.
- Equipped with DC Servo Motor for maximum torque even at low speeds.
- Precision speed control by 10-turn potentiometer, the most accurate of any Lathe on the market.
- Optional 20" Multi-function Extension can be mounted in 4 different locations for various applications:
 - Left or right side of bed as an extension
 - On the side of the bed for alternate or auxiliary banjo positioning
 - Low on the leg for outboard turning with increased capacity
- Multi-function Extension is equipped with keyhole slots for easy mounting at any location.
- Sliding Headstock features a projected nose cone for the bearings which provides unparalleled tool clearance around the workpiece.
- Digital Read Out for accurate RPM reading.
- Sliding Headstock, Tailstock, and Banjo are fitted with soft-grip handles.
- Heavy castings and webbing throughout for strength and vibration reduction.
- Easy belt change.
