

STAND ON LARYEE, STAND ON QUALITY

Mounting Press

MMP22/30/45 is suitable for minute or irregular shape and sample that is different to hold so as to cut or polish the samples. and then test metallographic, photo or hardness.

✘ This machine is controlled by digital temperature controller, after finishing mounting, it will cut off automatically. The timer control the sample time(internal initiative),and realize watching releasing.

✘ It is the ideal equipments in the tertiary institutions, industrial's

Model	MMP22	MMP30	MMP45
Sample diameter	Ø22×15mm	Ø30×15mm	Ø45×18mm
Heater specifications	650W 220V		
Temperature setting range	100-180℃		
Power	220V,50Hz		
Dimension	340X270X400mm		
Weight	33 kg		
Accessory	Heater , mosaic materials, fillers		

AMP50 belongs to automatic mounting press with the function of the water cooling system.

✘ It applies to all the hot mounting material plastic.

✘ After setting mounting parameter of the heating temperature, the press time and the press load, Operator puts the sample and the mounting material into it fasten the cover and press the start button. It will finish the mounting work without the operator watching near the machine.

✘ The operator can change 4 kinds of mounting moulds in accordance with the different requirements at any time.

✘ It is allowed that the operator can mount 2 specimens at same time with different moulds

Model	AMP50
Moulding specification	φ25mm φ30mm φ40mm φ50mm
Power	220V 50HZ
Max power consumption	1800W
System pressure setting range	0~2MPa
Temperature setting range	0~300℃
Setting range of holding time	0~99min99sec
Dimension	615×510×500mm
Cooling system	Water-cooling
Weight	110 kg
